PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with strong interest in Software Development, Artificial Intelligence, and Data Science. Experienced in building machine learning models, backend systems, and responsive web applications using Python and modern web technologies. Skilled in data preprocessing, NLP techniques, and cloud fundamentals. Passionate about applying technology to solve real-world problems and developing scalable, data-driven applications.

TECHNICAL SKILLS

Programming Languages:	Python, C, C++, Java, JavaScript, SQL
Machine Learning:	Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, Natural Language Processing (NLP), TF-IDF
Cybersecurity Concepts:	SHA-1 Hashing, K-Anonymity, Cryptography Fundamentals, Secure API Integration
Cloud Platforms:	AWS Fundamentals, Oracle Cloud Infrastructure (OCI), Google Cloud
Web Development:	HTML, CSS, JavaScript, Python, Streamlit
Tools & Technologies:	Git, GitHub, Jupyter Notebook, VS Code, Streamlit

PROJECTS

AI Based Fake News Detection System

- Developed a machine learning model to classify news articles as real or fake using Python.
- Implemented Natural Language Processing (NLP) techniques including tokenization, stop-word removal, and TF-IDF vectorization.
- Trained and evaluated models using Logistic Regression and Random Forest algorithms.
- Achieved 92% classification accuracy on the testing dataset.

Personal Portfolio Website

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and technical experience.
- Built the frontend using HTML, CSS, and JavaScript with a clean and user-friendly interface.
- Integrated GitHub project links and professional profile information for easy accessibility.

Mental Health Awareness Backend System

- Developed backend components for a mental health awareness platform aimed at improving digital support systems.
- Implemented RESTful APIs and backend logic using Python frameworks.
- Focused on secure data handling and scalable backend architecture.

INTERNSHIP EXPERIENCE

Data Science / Web Development Intern

Rinex Technologies | Jul 2025 – Aug 2025

- Worked on data science workflows including data preprocessing, exploratory data analysis (EDA), and model evaluation using Python.
- Implemented machine learning techniques to analyze datasets and improve prediction performance.
- Assisted in developing responsive web interfaces and backend features for data-driven applications.
- Applied secure coding practices and version control using Git during development..

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

PGP College of Engineering and Technology (Affiliated to Anna University)

CGPA: 8.9 / 10 | 2023 – 2027

CERTIFICATION

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Google Cloud – Introduction to Data Science
- Google Cloud Cybersecurity Certificate
- Full Stack Development Certification – Rinex Technologies
- Data Science Certification – Rinex Technologies
- Python Essentials 1 – Cisco Networking Academy

STRENGTHS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Continuous Learning in AI & Data Science
